Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: Claims 1, 11 and their respective dependent claims are allowable because the recitation of a coat having two surfaces the obverse and reverse with two pairs of fasteners on each surface engagable with a removable handle on one surface of the obverse or the reverse. The fastener pairs are located on both the obverse and reverse back surfaces at the bottom of the coat and near the shoulder portions. The coat being foldable to a substantially rectangular parallelepiped shape to receive the handle connectable with the fasteners on either the obverse or the reverse. Both the obverse and the reverse surfaces can be used as the outer visible surface when in the folded position to retain the handle.

The reference of Boesen shows a stadium coat with two pairs of fasteners located on the back portion that are connectable to a handle when the coat is in a folded position. However, Boesen fails to teach the two pairs of fasteners on both the obverse and reverse surfaces so that the coat can be folded up and connected to a handle with either the obverse or the reverse as the outer visible surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
